

**Int. Appl. No. : PCT/GB2004/003386**  
**Int. Filing Date : August 5, 2004**

## **AMENDMENTS TO THE SPECIFICATION**

**Please add the following paragraph immediately after the Title of the Invention:**

### Related Applications

This application is a US National Phase of the International Patent Application No.: PCT/GB2004/003386, filed August 5, 2004, designating the US and published in English on February 17, 2005 as WO 2005/014040, which claims the benefit of British Patent Application No.: 0318247.4, filed August 5, 2003.

**Please add the following header on page 1 of the Specification as filed, immediately before the first paragraph (lines 3-5):**

### Field of the Invention

**Please add the following header on page 1 of the Specification, immediately after the first paragraph:**

### Background of the Invention

**Please add the following header on page 2 of the Specification, immediately above line 15:**

### Summary of the Invention

**Please add the following header on page 27 of the Specification, immediately above line 1:**

### Brief Description of the Drawings

**Please add the following header on page 28 of the Specification, immediately below line 10:**

### Detailed Description of the Preferred Embodiment

**Please replace the paragraph on page 36, lines 7-12 with the following amended paragraph:**

Bovine dendritic cells were isolated according to the procedure in Werling et al (2002) *J. LeuLoc. Biol.* 72, 297-304, and mRNA isolated. A SMART™ RACE cDNA amplification kit from Becton Dickinson (Cat. No. K1811-1) was used to amplify cDNA using the primer TAGCTGACTCCTTGTCCAAGTG (SEQ ID NO: 15). The amplified cDNA, referred to as variant 1, was sequenced and the nucleotide sequence is given in Figure 1.

**Please replace the header "CLAIMS" on page 37 of the Specification with the following header:**

WHAT IS CLAIMED IS:
